

LifeHammer

Auto-safety tools save lives - Traffic fatalities in the United States have declined significantly over the past 25 years. Government estimates show that since 1975, at least 115,792 lives have been saved by the use of seat belts and air bags. In fact, seat belt use has been shown to reduce risk of fatal injury to front-seat passengers by 45%, and the risk of moderate-to-critical injury by 50%. Air bags have boosted these totals by an additional 11%, and are effective as older cars are replaced with newer models.

But survivors of traffic accidents face another safety issue - entrapment. In the event of an accident, seat belts are often restricted and doors become jammed. Passengers may find themselves engulfed in water or flames. In these situations, LifeHammer is indispensable, putting lifesaving power within arm's reach.

Don't get trapped - LifeHammer is a multifunctional personal auto-safety tool. This compact hammer features two precision steel points for breaking side window. A well-protected razor-sharp blades enables seat belts to be cut in a single motion, freeing trapped passengers. Weighing just 3.6 ounces and measuring 7 inches in length, LifeHammer is easily used by people of all ages and strengths.

Life Hammer comes with a durable plastic holder for mounting on a vehicles floor or console. The holder features a florescent pin for visibility in the dark.

Developed in Europe and patented worldwide, LifeHammer has been approved by TÜV and awarded the Silver Medal by the German Traffic Council. LifeHammer is tested for reliability and quality before reaching the market.
